

We are proud to inform you that we have successfully completed our EduTrans project. All the materials we developed are freely accessible via <https://edutrans-project.eu/> so don't wait and take a look!  
In this fourth and last newsletter you can read about the last stages of our project.

**Enjoy reading!**

## Edutrans – from start to finish

Yes! We reached the finish. But this is also only the beginning. The goal was to produce learning materials for students and to train staff in the field of Energy Transition. The result is a great set of models that can be found on the website. We managed to present the manuals for both students and teachers in an attractive way, so they can be used on all kind of devices.

## Samsø – an island community that takes energy consumption seriously

At our project meeting at Da Vinci College in March 2022, we had a special guest. Marcel Meijer – the Mayor of the Danish island Samsø – talked about what had been done to reduce the energy consumption and use renewable energy sources in Samsø.

## Finalizing the project in Roskilde

All good things come to an end. After almost three years of hard work, we have finalized the Edutrans project during our last meeting in Roskilde, Denmark on June 28 and 29, 2022. Writing these words, it does feel almost a bit unrealistic.

After an informative tour through Roskilde Techniske Skole, we started up our laptops for the last bits of team work which had to be done.
